

How to disinfect Books with the Book Sterilizer Machine?

1. Upper-room Sterilization

2. Lower-room Sterilization

The self-service book sterilizer is a combination of the bottom machine room and upper and lower sterilization rooms.

★ The 2 sterilization room can work independently or work at the same time (First, hold books on both shelves. Then close the door. Press the "upper room sterilization", then press the "lower room sterilization" button to start the disinfection of both sterilization rooms).

★ Open Door Protection: During the sterilization process, the power will be automatically cut off and the UV-C lamps will be turned off when the door is open.
